Moving Into The Future: National Standards For Physical Education

Synopsis

An essential tool for every quality physical education program for Kindergarten through 12th grade, this text establishes content standards that clearly identify consensus statements on what students should know and be able to do as a result of a quality physical education program. The second edition, based on input from practitioners who have been using the standards in their programs for the past eight years, reflects the current thought and the most recent research in physical education.

The National Association for Sport and Physical Education seeks to enhance knowledge and professional practice in sport and physical activity through scientific study and dissemination of research-based and experiential knowledge to members and the public.

Customer Reviews

NASPE is the National Association for Sport and Physical Education. It is a member of AAHPERD, the American Alliance of Health, Physical Education, Recreation and Dance. Judy Young is our contact person at NASPE.

This book helped me pass the praxis with no prior experience in PE. It's a really good one.

This is a good resource for all physical educators and sports coaches to have in documenting and understanding the standards that physical education should cover.

This is something I recommend for all teachers, new and old. It helps state standards and keep PE teachers on track instead of just rolling out a ball. It is a short print, but the price covers the size of the material.

received product as described! thumbs up!

The item matched the description and arrived within a satisfactory time period. I am a satisfied customer and would buy again.

my text book came on time for my classes and came in great quality, bought it used and looks brand new

Everything went smoothly. It arrived on time and was everything the description said it would be. I was very satisfied.

I like paying 1/2 or less at than the bookstore for new books! (the bookkstore used are 2X as much!)
