Customer Reviews

Roger Tory Peterson, one of the world's greatest naturalists, received every major award for ornithology, natural science, and conservation as well as numerous honorary degrees, medals, and citations, including the Presidential Medal of Freedom. The Peterson Identification System has been called the greatest invention since binoculars. These editions include updated material by Michael O'Brien, Paul Lehman, Bill Thompson III, Michael DiGiorgio, Larry Rosche, and Jeffrey A. Gordon.

This is one of the most detailed field guides I have ever owned. On my trip to St. John, USVI it was very useful and had interesting facts about many animals. The only complaint I have is that there was only a few pages of pictures in the center of the book, many of these not even in color. Not that I wanted a picture book, but it would have been nice to have more pictures of animals throughout the book to help identify species. Good guide overall, would recommend to anyone going to the Caribbean.

Old copy - design is flat.

Bit outdated, but still a handy reference.

Exactly the book i was looking for! It's help a bunch in class is very complete and specific. Just what any aspiring veterinarian need.

Gave as gift to friends in Caribbean.....

This is a good field guide, but until now it old, and it has so much text

Dry

does the job
