Urban Problems And Community Development

Synopsis

In recent years, concerned governments, businesses, and civic groups have launched ambitious programs of community development designed to halt, and even reverse, decades of urban decline. But while massive amounts of effort and money are being dedicated to improving the inner-cities, two important questions have gone unanswered: Can community development actually help solve long-standing urban problems? And, based on social science analyses, what kinds of initiatives can make a difference? This book surveys what we currently know and what we need to know about community development's past, current, and potential contributions. The authors--economists, sociologists, political scientists, and a historian--define community development broadly to include all capacity building (including social, intellectual, physical, financial, and political assets) aimed at improving the quality of life in low- to moderate-income neighborhoods. The book addresses the history of urban development strategies, the politics of resource allocation, business and workforce development, housing, community development corporations, informal social organizations, schooling, and public security.

Book Information

Paperback: 642 pages

Publisher: Brookings Institution Press (March 1, 1999)

Language: English

ISBN-10: 0815718756

ISBN-13: 978-0815718758

Product Dimensions: 6 x 1.4 x 9 inches

Customer Reviews

"Combined, the essays and commentaries provide insights into ways to use community development initiatives to improve the quality of life in cities, especially central cities." —Louis F. Weschler, Arizona State University, The Social Science Journal, 9/1/2000"The most substantial product to date of the National Community Development Policy Analysis Network.... The writing

throughout is thoughtful and reflective. The authors and editors have succeeded in keeping the text nontechnical and free from jargon." —Avis Vidal, Urban Institute, APA Journal, 4/1/2001 "This book surveys what we currently know and what we need to know about communities development's past, current, and potential contributions." — 'DISP' Switzerland, no. 143; 2000

William T. Dickens, a senior fellow in the Economics Studies program at the Brookings Institution, was previously a senior economist on the President's Council of Economic Advisers and professor of economics at the University of California, Berkeley. Ronald F. Ferguson has taught at Harvard University's John F. Kennedy School of Government since 1983 and is senior research associate at Harvard's Wiener Center for Social Policy.

A bit dated by now but a nice period piece (1990s) on the economic development movement.

Yes, great reading material for my Practicum course.
