Do NOT purchase anything for Medical Transcription!! Please!! This is an almost defunct career choice. As a 37+ year veteran in this field, almost every job has been absorbed by the new

computer policies of the Obamacare regime. Almost every transcription job has been cut. There are no jobs, so it's not wise to invest in any tools to do this job. Do yourself a favor and don't waste your money on anything related to this field. It is just about impossible to get a job and there are people with YEARS of experience all over the country who are out of work. I know of one facility that went from 40 transcriptions, down to 3, and that is just one facility!!

I received this book in great condition. I was very pleased and I still have it

This book is an excellent condensed resource book for basic generalized information specific to Medical Transcription. There are breakdowns of words, terminology, tests and exercises for skill building. It is basically a text book used apparently for Medical Transcription. I would recommend it highly for anyone going into this field or returning to it
