I had never purchased an I Spy book before this one so I didn't really know how my son would react to it, but he seems to really enjoy it. I definitely think the search pages have an appropriate amount of items for a 2 yr old to search through without getting overwhelmed. It is also a good book to practice counting because all the items on the search pages correspond to the number shown. For

example, the number 2 search page has a pair of shoes, a 2 of spades playing card, binoculars, etc. The only thing I find odd about the book is that it stops at 9 and the cover shows up to 11. I think this is because it was adapted from another I Spy book that is geared toward older kids, but I feel they should have at least included the number 10. You don't typically ask kids to count from 1 to 9 when practicing counting, 10 is usually the stopping point (or 5 for younger kids). It's not a huge deal, and definitely doesn't take away from the search and find factor of the book, but it's just something I wanted to mention since I found it strange. Overall a good purchase.

I like these books, it is to young for my 3 year old grandson

Great book. The pages are smaller and not as jumbled with things to spy as the hardback books are; but still, for my 3 year old who is learning her numbers and letters, this book is gonna make a great gift.

I love this great for little kids!

My son loved the book, great buy.

Cool book

My biggest issue with this book is that it is really more suited for a 2-3 year old, not 3-7 year old. It was too young and simple for my 3 and a half year old.

Purchased for my 3 year old grand son who really enjoys I Spy. Not as hard as some of the other I Spy books but this one does help with number recognition. We love everything I Spy.
