Founded in 1915 as the Cartographic Group, the first division of National Geographic, National

Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

Graphics are and information are of usual good quality you'd expect from Nat'l Geo, but this format lacks enough detail to be very useful. Australia is roughly the size of the continental US, so you can imagine the kind of resolution you get on a US map covering half the country. To be real informative and useful I need something with much more detail.

Not as detailed the Michelin maps we prefer but it was the only one we could get in the US without waiting for it to arrive from the UK.

Helped somewhat on our trip. The GPS system worked best though.

This map series is excellent. Great detail for an extended trip (and works when WiFi is not available). Plastic coated and strong. I will definitely look for maps in this series when traveling.

This map is just what you would want it to be. Plenty of detail. Easy to read. Practically indestructible. You'll be glad you ordered it.

my husband bought this but I think he has enjoyed it

Wish it want just a bit more west to include a few more towns we are planning to visit.

Received. Thank you very much.
