A coloring book for true badasses. Yup.. that's all I can say. Pages and pages of people so naked, they don't even have skin. People- and parts thereof, are displayed in heartwarming form and terrifying accuracy (Though not so terrifying once one has actually done time in the cadaver lab). The book's blow-out sections are helpful to my "how the hell old is she anyway?" ancient eyes; the well-defined images that accompany the more detailed body systems were a big part of my evil secret to earning an A+ (you heard me right, and yes, it was a first) on my Anatomy final exam. Being a dork, I don't take tests well, but because I could sort of feel out the images of the body's landscape, I was able to recall what-part-goes-where, and the intricacies of deeper systems embedded themselves more thoroughly into my Haiku-layered brain. Coloring the images helps with the learning process so very fully. So, whatever your age, good people, get yourself a nice big box of crayolas (I hear they're edible, just like so many body parts), and play god with the Magenta, the Spring Green, and the Tangerine.

A last minute request from my son's Biology teacher, this workbook is exactly what we hoped it would be. Large, detailed illustrations that assist in making learning about Biology a true "hands on" experience. Ordered a second copy for a classmate who was having difficulty locating it through other outlets...very satisfied!

Definitely helps in learning and memorizing the anatomy! I definitely recommend this to anyone taking human anatomy

This is a great contribution to anyone's anatomy learning. With the description of what you are coloring on one page and the picture on the other with the color coding categories, this has been a bonus.

This is a very good study guide and coloring book for A&P I and A&P II ! I purchased 2 of these one for myself and one for a friend

I prefer the previous edition better though

I ordered this years ago for my daughter's anatomy class. She used it and was pleased with it.It came at the right time for her to take advantage of it.

I bought for my daughter who is in anatomy class. She says it has helped her learn.
