How To Effectively Document Your Patient's Personal Injury Case From A To Z

Synopsis

Any devastating injury resulting from an accident can greatly affect your life, your personal well-being and even those close to you. This book is based on my legal experience as a California personal injury attorney and counselor of law duly licensed by the state of California. I have been representing injured adults and children in California since 1999 and my entire law practice focuses on injury cases. I truly enjoy specializing in the area of California personal injury law. It keeps me sharp and by doing so, I stay on top of any changes to the law. I hone my litigation and negotiation skills with every case successfully completed. At the same time, I get the personal satisfaction of using my skill and experience to help my injured clients obtain the justice they deserve. BY READING THIS BOOKâ |doctors, chiropractors and other medical professionals who treat injured patients will be â œeffectively and appropriatelyâ • educated on how to document their patientsâ ™ injuries so that the values of these personal injury cases are not diluted by the insurance companies."There really are not many resources for doctors on this subject. My goal is that this book presents a great opportunity to help educate physicians on the reality of what is going on with personal injury documentation." â " Mark C. Blane

Customer Reviews

This is one of the best books on effective injury documentation that I have had the chance to read. I have been teaching doctors and attorneys to better understand spinal ligament injuries and when it comes to the documentation part this is one of the main books that I recommend. It is very easy to read and very easy to understand. Mark has just done an outstanding job with this book. Doctors should provide this level of documentation with every injury patient that they treat, as this makes everyone's job easier and it also allows the patient's access to any benefits that they may be entitled to. Personal injury or injury work has been made complicated and often is known for its antagonistic nature, great documentation can seriously reduce the adversarial nature of the personal injury medical legal process. Mark Blane has really nailed this one!

Great information for all healthcare providers who treat auto injury patients, a MUST READ, especially if you are active in the medico-legal arena

A must have for providers that treat personal injury patients!
