Customer Reviews

NEIL V. WATSON is Professor of Behavioral Neuroscience, Simon Fraser University, Canada. S. MARC BREEDLOVE is Barnett Rosenberg Professor of Neuroscience, Michigan State University, USA.

Just what my daughter needed for school

Easy read as apposed to some of the other biology based books I've read

This is the book that made me realize that college is exactly the same as high school. It was about as complex as the average 8th grade text book. I got an A in the class though so that's cool.

The price was fair and it got here okay some previous highlighting but the book is intact and I can still use it.

Came in great timing, book looks great and a terrific price for such a nice textbook.

This book is really good and easy to understand the concepts. I like it so much I may keep it for my library. I bought it for half the price of a new book and this book was like new condition.

Needed the book for class. Cheaper than the bookstore.

In good condition.
