Manual Of School Health: A Handbook For School Nurses, Educators, And Health Professionals, 3e

Synopsis

Completely updated, the 3rd edition of this practical, highly portable manual offers quick access to the most relevant health and wellness information for children -- from birth through age 21 -- in the school setting. You'll find valuable guidance on developmental stages, learning domains, acute and chronic illnesses, first aid, medical syndromes, special education, and emergency illness. This edition also addresses the growing array of issues affecting today's children, including mental health disorders, disaster management, substance abuse, and school violence, as well as new threats such as West Nile virus, dermatological conditions, and the reemergence of tuberculosis. Ideal for use in school and community settings, this manual is a must-have resource for anyone who works with children. A best practice approach to health issues and concerns helps you provide the best possible care to students. A clear, consistent outline format and straightforward writing style make it easy to locate and apply essential information. Updated content includes important contemporary issues in schools, such as body piercing, backpack syndrome, and computer ergonomics. The Brain Findings section offers relevant information about recent brain and neurology research, with insights on how it relates to childhood development and health. Numerous appendices, including the latest growth charts and immunization schedules, provide essential information for assessing school age children. English-Spanish translation guide for common health terms and phrases helps you communicate more effectively with Hispanic students. Web site resources at the end of each chapter provide reliable sources for further information and research. A convenient Glossary familiarizes you with important terminology and definitions used throughout the book. New, user-friendly design helps you find key information quickly with helpful boxes, tables, and headings. New 8-page color insert serves as an instant visual reference to help you identify rashes, skin lesions, and other dermatological conditions that are common among school-age children. A separate chapter on first aid walks you through the management of common injuries and emergency situations. Revised mental health chapter presents current, detailed information on the major mental disorders that affect school-age children such as depression, autism, and Asperger's, with an extensive psychotropic medication table. A new chapter devoted to disaster management includes the latest information on bioterrorism and homeland security threats to help you create an action plan for disaster situations. A revised chapter on violence addresses sexual assault, self-mutilation, suicide, domestic violence, and violence in the schools, to help you stay informed about current societal trends, issues, and developments. New information on teen pregnancy offers helpful guidelines on communicating with students about this important issue.

Customer Reviews

Ã¢â€œ“Its delivery of information is precise, well structured and easily accessible; Nursing Standard, February 18 :: vol 23 no 24 :: 2009

Read it cover to cover, especially if you are planning to take the National Certification Exam. Know that the general guidelines are truly guides, not laws. Each State has its own specific regulations for school nurses. This is an excellent resource to have in your school nurse office.

I think this book will come in handy as I learn the ropes. No one teaches you how to be a sub!

Concisely written, very informative with a lot of subjects covered.

This is a great book for a school nurse. Lots of useful information on the wide range of issues nurses in a school setting encounter.

Very helpful resource for any school RN or substitute school nurse to have in their collection.

Great reference for school nursing!

Excellent book! Very detailed. I really learned a lot of things I wasn't aware of.

Simple to use. Great resource for not only me but my health tech and secretaries that fill in when I am at my other school.
