Customer Reviews

I'm not a fan of this book. I thought it was going to be a book for my 2nd grader but it's mostly just a picture book that doesn't go into full detail about what animals eat. You can click on the "Look inside" and see a preview of the book. This is the format throughout the book. A child asks a question "What do elephants eat?" and then below that is the answer. "They eat fruits." Then there is a picture of the animal either on that page on the page before. Also, Speedy Publishing books usually have awesome photographs in their books and this is just cartoon pictures. Here are some of the animals in the book and what the book says they eat: Mice eat cheese. Rabbits eat carrots. Cats eat mice. Overall, I would not pay for this ebook, It's offered for free right now so you can grab it

while it's free you have nothing to lose. There are over 200 ebooks offered by Speedy Publishing and many are free. They seem to rotate through which book are free. So, if you are in the market for these kinds of books, I would search and see which ones are offered now and then check back later.***** Received this ebook for free in exchange for my honest review. *****

I'm using the same review, copy/pasted from my last Speedy book, as the same holds true for this book as it did the last one I'm taking a different approach with this one, it occurred to me after reviewing a number of these Speedy Publishing LLC kids ebooks that I'm not exactly their target audience. So, with that in mind, I read the book with my two children and then let them provide feedback that I would base my review on. My two girls (and 5 and 7) gobbled it up. Usually they fidget when it's time to read a book, or this one wants a glass of water, then that one needs to use the restroom. They usually won't sit still for a story unless they were literally glued to their seats. The bonus to this point is they both had MANY follow up questions for each question and their subsequent answers from the book. They remained very curious and engaged from start to finish of the book (almost an hour and a half due to me having to have dialogue with them and answer all of their other questions) I asked them at the end of the book what their thoughts of the book were and to quote the oldest said " I loved it! can we read it again!" so obviously she loved the book and as such I would say it was a hit for the intended reader. Here's my little caveat though, the book's intended audience is perfect only as long as an adult is available to answer the slew of follow up questions from the book. That is not necessarily a negative. I think this book offers an opportunity for the parent/child to actively engage in dialogue and ends in relationship building. Based on that fact I give a solid 4 stars and would purchase this book as well as the others by this same author, I would just do so with the knowledge that it's an active Q & A style book, and gets their brains working so for sure not a bed time story type book. I received this free or discounted for testing and reviewing the product. I am under no obligation to provide a positive review and receive no incentives or rewards for doing so. My aim is to highlight features and drawbacks that I would want to know about as a buyer. My remarks are sincere and my own. I work very hard trying to write insightful and thoughtful reviews for each item. This helps me to be a better reviewer. While it is true that many items are received at discounted rates or complimentary, my reviews are completely honest and unbiased. I receive no monetary compensation and not required to give a good review. This disclosure is in accordance with the Federal Trade Commission Guidelines on Testimony and Advertising.

My review of another book by this same publisher applies to this title. of the 3 we choose this was my sons least favorite. he still enjoyed it, however wasn't as drawn in as he was with Kids Book of Questions Why do I...here is that review. All the same principals apply to What do Animals eat...Okay so I have decided to go about my review a littler differently than I usually do. I am going to allow my child to give me their feedback and base the majority of my review on that since lets face it this book is intended to be reviewed by the actual reader not by a 30 something mother of 2. lol! So with that said I read this book to my 6 year old son and he seemed to just gobble it up. His usual wont sit still for a story self was literally glued to his seat and listening intently (which if I were reviewing as his mom would be a HUGE plus) he had many MANY follow up questions for each question and their subsequent answers from the book (which if i were reviewing as his mom would kind of annoy me since I then in turn had to spend several minutes answering the questions with content not available in the book) He remained very curious and engaged from start to finish of the book (almost an hour and a half due to me having to have dialogue with him and answer all of his other questions) I asked him at the end of the book what his thoughts of the book were and to quote him he said " I loved it! can we read it again!" so obviously he loved the book and as such I would say it was a hit for the intended reader. Now here is where I will give my mom feedback. I found that the books intended audience is perfect only as long as an adult is available to answer the slew of follow up questions from the book. That is not necessarily a negative. I think this book offers an opportunity for the mother/Child to actively engage in dialogue and ends in relationship building. based on that fact I give a solid 4 stars and would purchase this book as well as the others by this same author, I would just do so with the knowledge that its an active Q & A style book, and gets their brains working so for sure not a bed time story type book. I did receive this book for free in exchange for my honest feedback. My opinions are never swayed based on promotional pricing as an online shopper personally I review heavily on reviews when making my purchases.I hope my reviews are helpful for you in your shopping experience. If they are please check the helpful button so I know how they are being received and can take that feedback in mind when reviewing more items so I can better serve you all as well.
