# Fast Facts For The ER Nurse: Emergency Room Orientation In A Nutshell, Second Edition

## Synopsis

Because ER nurses need to think fast and act fast . . . *Fast Facts for the ER Nurse* is the only orientation guide and reference designed specifically for new ER nurses and the preceptors responsible for their orientation. The chapters provide a brief overview of equipment, treatments, and drugs used to manage common disorders and conditions frequently seen in the ER. The book includes disorder definitions, signs and symptoms, interventions, drugs, and critical thinking questions. Using a bullet-point format, each chapter is conveniently organized alphabetically by disease and disorder within each body system for quick access. The book serves as an organized, reliable, and thorough ER guide, ensuring a structured approach to orientation. The book's "Fast Facts in a Nutshell" feature provides quick summaries of important points, questions, and answers at regular intervals throughout. Other useful features include a skills checklist, coverage of common lab values and medications, and EKG rhythms. Key Topics Include: Cardiovascular Emergencies Disaster Response Emergencies Infectious Disease Emergencies Mental Health Emergencies Shock and Multisystem Trauma Emergencies Substance Abuse and Toxicologic Emergencies New to this Edition: Endocrine Emergencies Environmental Emergencies Dental Emergencies Rapid Sequence Intubation Triage Acute Stroke Management Guidelines Sexual Assault-Intimate Partner Abuse

Jennifer R. Buettner, RN, is a full time Registered Nurse at Emory University Hospital at Midtown in Atlanta, GA, USA. She has ten years of ER Experience and 3 years of experience precepting new graduate nurses and new employees in the ER. Jennifer is Certified in ACLS, PALS, TNCC, and as a Nurse Preceptor (Rockdale Medical Center/2005). She won the Faculty Award for the graduate who "has achieved excellence in both the academic and clinical settings and who best exemplifies the total integration of program philosophy to professional performance" (5/2002). She has developed an ER Orientation Packet and Education Course for two local hospitals.

Don't waste your money on this book. This is very very very basic information that you can get from Google or even an old med surg book. "Keep a stash of dark chocolate on hand. They are a good source of antioxidants and energy." This is a quote from the book. This basically how this whole book is written. Again, save your money.

This is a great first choice book, for very fast info. But it should be used with a more thorough book like: Sheehy's Emergency Care. Sheehy's has a lot more in depth information. But this book is fast, to the point, and directs you in what to look up, it is also smaller and easier to take to a fast-food

restaurant so you can study while you eat.

If you are a graduate nurse or new to the ED, this book is a MUST HAVE!! Much of the information in this book was covered in my ED orientation. This book gave me the working knowledge that I needed to jump start my ED training. Plus, this book provides a patho and nursing intervention review, including common meds used in the ED. Great book, highly recommend it if you are entering the ED.

Great for new nurses and great for those nurses who want to review quickly. Very well written and easy to study.

This was a really good book to guide the new grad ER nurse! It was helpful for me to have a quick reference for questions about ER nursing. I always have it with me at work. I recommend it!

I enjoyed reading it, but it was a little more basic than I expected.

I recommend this book for those who plan to work in the ER with no prior ED experience (nursing students, new grads or even nurses from other area of nursing

Very helpful for a new ER nurse! The indexes in the back on commonly used ER drugs is especially useful!
