Clinical Case Studies For The Nutrition Care Process

Synopsis

Designed for graduate nutrition students, dietetic interns, and practicing dietitians, *Clinical Case Studies for the Nutrition Care Process* presents realistic scenarios for a variety of cases organized in the format of the Nutrition Care Process. Cases are drawn from the author's experience and collected from practitioners who are experts in their field, providing a variety of interesting scenarios. Topics such as adolescent obesity and dietary management in diabetes are explored. As a part of the American Dietetic Association's Nutrition Care Process (NCP), dietitians, educators, and students have been asked to adopt a new standardized language for nutrition diagnosis. While this process utilizes many aspects of the traditional care model, dietitians may be unsure of how to implement the completely new aspect of standardized language and Nutrition Diagnosis. Not only does this book include an introductory section on the Nutrition Care Process, but readers will learn how to use the standardized terms, develop a nutrition diagnosis, and apply the standardized language to specific clinical cases.

This book has interesting cases and stimulates thought regarding practical applications of principles to real life situations. Good teaching / learning tool

This book would have been perfect if it had the answers to the clinical case studies at the back so you can see if you are on the right track when completing these case studies. I was trying to use it to study for my Rd exam and to be A better dietetic intern. The book was useless to me.
