Age Range: 8 - 12 years

Grade Level: 4 - 6

## Customer Reviews

This is not a biography, per se. The "Childhood of Famous Americans" books are a series of fictionalized accounts of the youth of famous Americans. The conversations and (some) scenarios may be made up, to show the character formation of the famous person. The places and names of people are biographical; some of the situations are probably not. Having said that... we like this series very well. And wow, we have enjoyed Thomas Edison! The book emphasizes values like responsibility, curiosity, and hard work. Some of the stories made us laugh, and they all made us even more interested to find out what would happen next. Our kids were the most excited about Thomas's laboratory in the basement, and in his job on the train.

My son read this book this first day it arrived. He LOVED it. Hes 9 and it os great for his reading level.

Thanks

This has been an excellent book which holds your attention and makes you want to read more!

My 4th grader enjoyed it.

Very pleased!

This book made a great Christmas gift for my 9 year old grandson who loves to read about American History

Have you ever tried to sit on an egg and hatch it? Thomas Alva Edison did! He was a young who was curious about the world around him. He was born in a city near New York City. His family did not have much money, but they made a great effort to send young Thomas to school. At his first school that he attended, he was expelled for asking too much questions to her teacher. At his other 2 schools that he went too, he was also expelled for asking too many questions. At a young age Thomas would sell newspapers at a railroad. At the young age of 23, Thomas invented the phonograph, which is the grandfather of the Compact Disk. Then a couple of years later Thomas after 7 attempts invented the Light bulb. Years after inventing the light bulb, New York City was entirely lighted by light bulbs thanks to Thomas. He was even called "The wizard of Menlo Park". This hilarious biography will make you want to keep reading and reading. The only thing that can stop you is the end of the book! The author, Sue Gut ridge, really makes you feel like if you were really Thomas Edison and by the way she describes him, you feel sad when Thomas is sad and you feel happy when Thomas is happy. This book is for someone that likes to laugh and feel really emotional at the same time. Thomas Edison is a motivating biography that makes you feel better about yourself. When I read this book I felt muck better about my family and myself. I realized that I could be anyone if I wanted to by just closing my eyes and having a good imagination. Read it, buy it; you will have hours of unstoppable fun while you read this marvelous book and it has a marvelous ... price.
