Wright Sites: A Guide To Frank Lloyd Wright Public Places

Synopsis

Frank Lloyd Wright's groundbreaking designs, innovative construction techniques, and inviting interiors continue to astound and inspire generations of architects and nonarchitects alike. The only comprehensive collection of Wright-designed buildings open to the public in the United States and Japan, *Wright Sites* has been revised and expanded to celebrate the 150th anniversary of the architect's birth in June 1867. The fourth edition of our best-selling guidebook contains twenty new sites, updated site descriptions and access information, and, for the first time, color photographs. It also includes itineraries for Wright road trips, a list of archives, and a selected bibliography. The introduction, revised for this edition, is by Jack Quinan, a founding member of the Frank Lloyd Wright Building Conservancy and author of *Frank Lloyd Wright's Martin House*.

Customer Reviews

"With the newest edition of *Wright Sites: A Guide to Frank Lloyd Wright Public Places*, Joel Hoglund of the Frank Lloyd Wright Building Conservancy provides the only comprehensive guide to Wright-designed buildings open to the public in the United States and Japan. Though the book is envisioned as a guide, it also illustrates Wright's professional evolution and philosophy of organic architecture, with photographic examples of his differing regional styles as well as Prairie Style and Usonian houses." - SavingPlaces.org (website of the National Trust for Historic Preservation)

The Frank Lloyd Wright Building Conservancy is an international nonprofit organization whose

mission is to save Wright-designed buildings from destruction and neglect, as well as educate the public about the architect's influential role in American history and culture. Based in Chicago, Wright's adopted city, the conservancy "facilitates the preservation and maintenance of the remaining structures designed by Frank Lloyd Wright through education, advocacy, preservation easements, and technical services." Jack Quinan, the introducer, is a founding member of the Frank Lloyd Wright Building Conservancy, a retired professor of art history at SUNY Buffalo, and the author of two books on Wright's work: *Frank Lloyd Wright's Buffalo Venture* (Pomegranate, 2012) and *Frank Lloyd Wright's Martin House: Architecture as Portraiture* (PAP, 2004). Joel Høglund is the Communications and Events Manager of the Frank Lloyd Wright Building Conservancy.

Excellent work great history and photos. Planning a road trip to catch a few more Wright structures. Am lucky to live in Buffalo have lived in one of his homes but as a grade schooler to have known the family that lived in the Darwin Martin House and to have been inside many times.

Looking forward to spending more time with this book. Amazing architecture. Well done photography... Especially by Christin Cordova/Little C Photography!

Well researched book with plenty of information about locations of FLW-designed homes and other buildings. It also provides information about whether properties can be toured or whether they are private properties. Very up-to-date with one of the most recent sites listed (At Crystal Bridges Museum in Bentonville, Arkansas) This is an excellent resource.

Got this for my husband. He has an interest in Frank Lloyd Wright works. He like this book.

Great guide book to a master architect's gems.

Just what I was looking for. I would love to see them all.

I found this volume to a very comprehensive and highly informative overview of Frank Lloyd Wright's body of work.

I love this updated volume of Wright Sites.
