## Customer Reviews

I CANNOT stress enough how much time this have saved me. I use the lab values every single time I prep and my instructor thinks I'm a genius that has spent hours researching the meaning of the lab values but it's this book. It takes me seconds to look up my info! MUST HAVE for prep. All of my classmates have purchased as well!

I'm a nursing student and I have most of his guides on my iPad while I study. They are short and to the point. I absolutely love these guides and I wish I found these earlier. Thank you! :-)

Easy study guide broke things down for better absorption. Especially the EKG aspect nice illustrations and graphics as well that are printable

This is fantastic. Short and detailed. Only need to know!! I wish it had liver stuff since I have a test for that coming up, but besides that this is awesome!!

Really enjoyed the 140 medications.

Very Convenient for Pharm Exams!! Very Helpful!!

I received it quickly and it was what I expected it to be. Very informative.

Such a huge help!! Definitely fills in the gaps. A much needed resource for all nursing students, and

such a time saver!!
