10-Minute Life Lessons For Kids: 52 Fun And Simple Games And Activities To Teach Your Child Honesty, Trust, Love, And Other Important Values

Synopsis

52 playful and easy to understand activities to help parents teach children moral lessons that they won't forget. A child says, "I hear and I forget, I see and I remember, I do and I understand."

10-Minute Life Lessons for Kids is a book about seeing and doing--a book that gives parents the ability to teach the powerful principles of honesty, trust, generosity, love, and other values. Children will discover the objectives themselves as they actively participate in fun games and activities. The games can be done in any order, with very little planning and with very few supplies--just common objects most people have around the house like toothpicks, string, pennies, or an apple. Some can be done while riding in the car, and others can be expanded to fill a whole evening with family fun. The activities in 10-Minute Life Lessons for Kids will not only create cozy and enjoyable moments of family togetherness, they will have a lasting impact on your growing child.

Good book. I use it for life skills in my homeschool

This is a great resource for hands on groups with adolescents and children. I purchased it after borrowing a friends. It has simple engaging activities for all ages. When I'm leading therapy groups this book is a lifesaver and keeps the kids engaged even in a residential treatment setting.

My family and I played the first activity in the book about what things do you think you cannot live without. Once we got to the part where you have to eliminate items on the list that you can live without, it was very interesting to see the choices made. My son actually chose toys, electronics, etc first. I guess I am setting a good example and teaching him what is most valuable and that is love and family!!

Love it!! Many lessons learned and many conversations started.

I usually dog-ear (fold down the corners) of my favorite pages in these types of books. This particular book has every entry dog-eared. I can't believe the amazing ideas and life lessons that are presented with NO time or experience or tons of supplies needed. One of my kids favorites: put a piece of hard candy in your mouth. Put a rock in your shoe. Now walk around while sucking the candy. When the candy has finally dissolved, talk about what you thought about the experiment. The lesson is that you can focus either on the negative or positive - they're both in every situation; it's just how you choose to look at things. LOVE this book!!!!!! Please write more!!!

Great book. I've used it several times in classroom lessons and small group counseling sessions. It

is broken into chapters surrounding different qualities and characteristics to encourage in children. Most lessons don't require too many props or supplies.

This is a very usable tool to teach children values on a concrete way that they can easily understand. Well written and well conceived. Very happy with this purchase.

Excellent highly recommend if you work with kids and family, the lessons are awesome and well received.
